A New Generation

Built upon the success of our original TechMate scan tool, TechMate Pro represents a new generation in marine diagnostics. With over 25 years of experience in designing and manufacturing marine diagnostic equipment we designed the TechMate Pro from the ground up with marine service technicians in mind.

Advanced Technology

Self contained and easy to use, the TechMate Pro uses the latest flash based microprocessor technology. New features include USB connectivity for easy updates, a high visibility multi-line graphic LCD display viewable in direct sunlight, SD card slot for system expansion, ergonomic soft-touch / anti-slip exterior for assured handling in marine environments, a water resistant key pad along with a host of other features.

Comprehensive Support and Features

The TechMate Pro has the widest marine engine support in the industry. Covering over two decades of marine EFI engines the tool displays complete engine control system information, faults and provides a variety of engine test and configuration features. TechMate Pro is the professional’s choice for marine service.
